16 August 2019

Dear Selection Committee,

I am writing this recommendation for Chloe Mainhardt, who was a student in my Functions, Statistics, and Trigonometry (FST) course during the 2018-2019 school year at the Macomb Mathematics Science Technology Center (MMSTC). Chloe is seeking to become a member of Lake Shore High School's National Honors Society and I recommend her for inclusion in this prestigious organization.

Chloe is an intelligent and capable young woman who has great potential. As in all high schools where students take challenging academic classes, sophomore year at MMSTC is a time where students need to hone their study skills, investigate new ways to learn content, and adjust to an increased academic workload. Chloe took advantage of this opportunity and really grew as a person and a student during her time in my classroom. She participated in a variety of projects in addition to her usual coursework in FST. One project that stands out is the Car Loan project, where she said "[this project] meant a lot to me because I could put my skills to real world situations and something I really want.

MMSTC is a competitive entry program and students must balance the work and activities at two different high schools. I believe that Chloe has the maturity and skills to be an active participant in Lake Shore's chapter of NHS while maintaining high standards in her classes.

I recommend Chloe Mainhardt for membership in the National Honors Society. I believe she has much to offer to NHS and much to learn from participating in such a worthwhile organization that will lead her toward her future goals and aspirations. It's a pleasure to be asked to write this letter of recommendation.

Sincerely,

Mathematics Instructor
